

Em-Brace

Finally a compression brace that is comfortable to wear and has the adjustability you need:

- The Em-Brace compression system provides support, stability, an increase in body awareness and often a calming effect through the compression of our unique highly customizable brace.
- Made from our revolutionary Kool-Mesh material, the Em-Brace provides optimal compression with an incredibly light weight breathable fabric.
- The flexible back panel is constructed with Kool -prene, a flexible neoprene like material with greater breathability.
- The Em-brace strapping is highly adjustable to optimize compressive characteristics , fit , trunk support and assist in activation and stabilization of core muscles
- Zipper front to enables quick and easy donning and doffing, while maintaining proper adjustment

Accessories to customize your Em-Brace include :

- **Thigh cuffs:** Comfortably blocks the Em-Brace from migrating upward . (no more uncomfortable straps in the groin area)
- **Shoulder posture correction straps:** Elastic hook engage-able straps can be added to the brace in a number of configurations such as a “figure 8” to encourage better positioning at the shoulders and chest
- **Posterior rigid panel** is removable and can be added to provide optimal positioning assistance without sacrificing comfort.
