

# Hyperextension Kit

Photos are with a Barbie doll in the system on her stomach (right leg.) This procedure is best done without the child.

Parts in hyperextension kit - 3

Place nut in slot - you may have to temporarily remove cuff.

Nut in position at end of slot.

Attach with screw.

Remove posterior screw holding key ring and place strap chafe under key ring holder. Reattach screw.

Cinch strap to block hyper extension. Keep the elasticity of the strap in mind. Test before putting on child.
